

Geology: Idaho's Great Rift

Exercise: 1

Instructions: The Great Rift system is a geological national landmark located in the Snake River Plain. This activity should make you more knowledgeable about this area and its geological significance.

1.	What is the Great Rift System?
2.	What is King's Bowl and how did it form?
3.	What do all of the geological features that make up the Inferno Chasm Rift Zone have in common?
4.	How did Wild Horse Corral form?
5.	Explain the formation of Split Butte.
6.	Name another Great Rift zone that is located to the southeast of Idaho.
